## TAMARA

Context: TDB-DST has provided funding support of ₹89.00 lakh for the innovative waterbody management project called "TAMARA".

- Addressing global water resource challenges is crucial, especially for India.
- AMRUT 2.0 mission focuses on preserving water bodies and promoting circular water economy.
- > Mission aligns with Blue Economy principles, emphasizing sustainable ocean resource utilization.

### TDB's Support for Responsible Waterbody Management

- TDB backs "Development and Commercialization of Intelligent Water Body Management System (IWMS)-TAMARA."
- > M/s Bariflo Labs Private Limited, Odisha, receives ₹89.00 lakh funding from TDB.
- Project's total cost: ₹150.00 lakhs.

### Innovative Elements of TAMARA Project

### Smart Sediment Aeration System:

- Robotic system moves diffuser aerators in water, increasing oxygen at water bottom.
- Tested successfully in various water types.

### Smart Climate-Driven Water Quality Monitoring System

- Monitors water quality from bottom to surface, following computer simulations.
  - Controls water nutrient levels and oxygen content.
- Smart Weed Harvester System (PLASHBOT)
  - Removes unwanted water plants using robotic components.
  - Employs smart navigation for efficiency.

### Communication System and Data Protection

- Utilizes secure technology for data exchange between devices.
  - Lab-tested for reliability.

### Al-driven Approach for Effective Waterbody Management

- TAMARA project uses AI, IoT, and robots.
- System comprehends weather conditions and water quality.
- Monitors oxygen and nutrient levels for aquatic life support.

### AMRUT 2.0 Mission

- Launched in October 2021 for a 5-year duration (FY 2021-22 to 2025-26).
- Extends the original AMRUT mission initiated in June 2015.
- > Aims to provide all statutory towns with tap access to guaranteed water supply and sewer connections.
- Ministry of Housing and Urban Affairs (MoHUA) oversees the scheme.
- Objectives:
  - Expand universal water supply coverage from 500 AMRUT-covered cities to all statutory towns nationwide.
  - Achieve comprehensive sewage and septage control in 500 AMRUT cities for city self-reliance and water security.
  - Reforms focus on water sector improvements, citizen comfort, and financial sustainability.
  - Build upon AMRUT's successes in water supply, waterbody revival, aquifer management, treated wastewater reuse, and water circular economy.
  - Attain 100% sewage and septic system coverage in 500 AMRUT cities.
  - Safeguard freshwater bodies against pollution to sustain natural resources.
  - Projected 40% of industrial demand and 20% of urban water demand to be met by recycled treated wastewater.
  - Implement fair water distribution, wastewater reuse, and water body mapping through Pey Jal Survekshan in cities.

### Adopt a Heritage Programme

**Context:** On September 4, 2023, ASI will introduce the "Adopt a Heritage 2.0 program," along with the Indian Heritage app and an e-permission portal.

### About the scheme

- "Adopt a Heritage: ApniDharohar, ApniPehchaan" is a partnership between the Ministry of Tourism, Ministry of Culture, and Archaeological Survey of India (ASI).
- Launched on September 27, 2017, to coincide with World Tourism Day.
- Aims to improve tourism by allowing public and private entities to manage heritage sites.
- Selection of sites is based on popularity and visibility.
- Individuals and organizations, known as "Monument Mitras," can adopt sites for five years.
- > The scheme covers 106 tourist spots, with over 600 Monument Mitras registered and 27 MoUs signed.
- > The Ministry of Tourism can terminate agreements with Monument Mitras for noncompliance or poor performance.

### **Objectives of the Scheme**

- Improving fundamental tourism infrastructure at historical sites, monuments, natural locations, and tourist attractions.
- Elevating the tourism experience through the creation of amenities and services at historical sites, monuments, natural areas, and tourist attractions.
- > Raising awareness and promoting the cultural and heritage importance of the nation's treasures.

## 1 September, 2023

#### **Monument Mitras**

- "Monument Mitra" signifies partners in the 'Adopt A Heritage' program.
- It started under the Ministry of Tourism and shifted to the Ministry of Culture.
- The project's aim is to improve monuments and tourist sites.
- Corporations, public sector firms, and individuals are invited to "adopt" these sites.

### Archaeological Survey of India

- ASI is linked with India's Ministry of Culture.
- Its work includes archaeological research, safeguarding ancient sites, and conserving monuments.
- > ASI oversees all archaeological activities with the Ancient Monuments and Archaeological Sites and Remains Act, 1958.
- It also manages the Antiquities and Art Treasure Act, 1972.
- > Founded in 1861 by James Cunningham, an enthusiastic British Army engineer.
- Archaeological efforts started earlier with the Asiatic Society formed by Sir William Jones in 1784.
- Often called the 'Father of Indian Archaeology,' Alexander Cunningham played a key role.
- > It became a statutory body under the AMASR Act, 1958, after India's independence.
- > Headed by a Director-General and headquartered in New Delhi.
- Over 3500 important monuments and sites are protected by ASI.
- > Notable ASI publications are "Ancient India" and "Epigraphia Indica."

### State of Food Security and Nutrition in the World Report-2023 (SOFI-2023)

**Context:** UN Agencies launched the 'SOFI 2023' report with the theme 'Urbanisation, agrifood systems transformation, and healthy diets across the rural-urban continuum'.

### Key findings

- Global Hunger:
  - Over 122 million more people are facing hunger worldwide since 2019 due to pandemic, weather shocks, and conflicts.
  - Global hunger numbers stalled between 2021 and 2022 due to these challenges.
  - Nutritional Access:
    - In 2022, approximately 2.4 billion individuals lacked consistent access to safe, nutritious, and sufficient food.
    - This issue disproportionately affected women and people living in rural areas.
  - Child Malnutrition:
    - In 2021, 22.3% (148.1 million) of children were stunted.
    - 6.8% (45 million) of children were wasted.
    - 5.6% (37 million) of children were overweight.
  - Urbanization and Diets:
    - Urbanization drives an increase in the consumption of processed and convenience foods.
    - This contributes to a rise in obesity rates in urban, peri-urban, and rural areas.
  - > Rural Shift to Markets:
    - Rural regions in Africa and Asia that were once self-sustaining are now relying more on national and global food markets.

#### Future Urban Population:

- It's projected that by 2050, 70% of the global population will live in cities.
- This demographic shift highlights the need to reshape food systems to address hunger and malnutrition in urban areas.

#### India-specific Findings

- India's cost of a healthy diet is the lowest among BRICS nations and neighbors.
- About 74% of people in India can't afford a healthy diet.
- Meal costs in Mumbai rose by 65% in five years, while salaries increased by 28%-37%.
- If a diet costs more than 52% of a country's average income, it's considered too expensive.
- > Between 2019 and 2021, the expense of a healthy diet increased by almost 9% in Asia, the highest among regions.
- > In Asia, South Asia had the most people (1.4 billion) and the highest share (72%) unable to afford a healthy diet.
- In Africa, Eastern and Western Africa together had the most people (712 million) and the highest share (85%) unable to afford a healthy diet.

#### About the Report

- The report is an annual flagship publication created collaboratively by organizations like FAO, IFAD, UNICEF, WFP, and WHO.
- It offers a detailed view, monitoring, and analysis of global hunger, malnutrition, and evolving food security dynamics.
- The report also provides in-depth insights into the main challenges of achieving these objectives within the framework of the 2030 Agenda for Sustainable Development.

Stom Coll Thomas	<ul> <li>Stem Cells and Therapy:</li> <li>Stem cells are undifferentiated cells with potential to differentiate into specialized cells.</li> <li>Stem cell therapy uses stem cells to prevent/treat diseases, promoting tissue repair.</li> </ul>
Stem Cell Therapy	<ul> <li>Working of Stem Cell Therapy:</li> <li>Stem Cell Extraction: Extract stem cells from bo ne marrow, process in lab.</li> </ul>
	<ul> <li>Specialization: Manipulate stem cells to specialize into needed adult cell types.</li> <li>Implantation: Replace damaged tissue with specialized mature cells.</li> <li>Applications of Stem Cell Therapy:</li> <li>Treat neurological problems, diabetes, arthritis and injuries.</li> <li>Study diseases, identify new drugs, screen for side effects.</li> </ul>
	Advantages of Stem Cell Therapy: <ul> <li>Disease Reversal: Renewable cell source for disease sufferers.</li> <li>Minimal Invasiveness: Non-surgical, no incisions or scars.</li> </ul>
	<ul> <li>Fast Recovery: Quick procedure, minimal downtime.</li> <li>Natural Healing: Stimulates growth of new cells for tissue repair.</li> </ul>
	Complication Prevention: No side effects, reduces infection risk.
Van Raji Tribe	<ul> <li>Origin and Region:</li> <li>The Van Raji tribe is one of India's primitive and vulnerable tribes.</li> <li>They primarily inhabit the villages of Kumaon Himalayas in Uttarakhand's Pithoragarh district.</li> <li>Many members of the tribe still practice cave dwelling, reflecting their ancient lifestyle.</li> </ul>
Actes	<ul> <li>Socio-Economic Status:</li> <li>The tribe faces socio-economic challenges due to their remote location and limited access to modern amenities.</li> </ul>
	<ul> <li>Economic activities often include subsistence farming, hunting and gathering.</li> <li>Cultural Significance:</li> <li>Their cultural identity is closely linked to the natural environment of the Himalayan region.</li> </ul>
	<ul> <li>Initiatives like Doon Sanskriti School in Dehradun provide education exclusively for tribal children, aiming to empower them through education.</li> </ul>
	<ul> <li>Inclusivity and Recognition:</li> <li>Events like President Droupadi Murmu's Raksha Bandhan celebration underscore the importance of recognizing and including vulnerable tribes like Van Raji.</li> </ul>
Kakrapar Atomic	<ul> <li>Such occasions provide a platform to showcase tribal culture and foster a sense of belonging.</li> <li>Location: Kakrapar Atomic Power Project (KAPP3) is located in Gujarat, India.</li> <li>Significance: It is a nuclear power plant that contributes to India's energy gener ation.</li> </ul>
<b>Power Project</b>	<ul> <li>Type of Reactor:</li> <li>KAPP3 features a 700-megawatt electric (MWe) nuclear power reactor.</li> <li>The reactor type is the Pressurised Heavy Water Reactor (PHWR).</li> </ul>
(KAPP3)	Initiation of Operations: KAPP3 recently commenced operations at full capacity. Safety Features:
	<ul> <li>The PHWR technology used in KAPP3 emphasizes safety.</li> <li>Thin-walled pressure tubes and enhanced safety systems contribute to its safety profile.</li> <li>Government Approval and Investment:</li> <li>The NDA government approved the construction of 12 reactors, including KAPP3, in 2017.</li> </ul>
	The project's capital investment is funded through a debt-to-equity ratio. Contributing to Energy Expansion: KAPP3 is part of India's efforts to increase nuclear power capacity from 7,480 MWe to 22,480 MWe by 2031.
Solar Ultraviolet	<ul> <li>What is Solar Ultraviolet Imaging Telescope?</li> <li>Solar Ultraviolet Imaging Telescope (SUIT) is a key payload developed for India's Aditya-L1 mission, aimed at studying the Sun.</li> </ul>
Imaging Telescope	<ul> <li>SUIT is designed to image two outer layers of the Sun, namely the Photosphere and Chromosphere, in the ultraviolet (UV) range.</li> <li>Developers: Created by IUCAA scientists Durgesh Tripathi and A. N Ramaprakash.</li> </ul>
(SUIT)	<ul> <li>Imaging Solar Layers:</li> <li>SUIT's primary purpose is to capture images of the solar Photosphere and Chromosphere.</li> </ul>
	<ul> <li>Photosphere is the innermost outer layer of the Sun and is directly visible. Chromosphere lies just above the Photosphere.</li> <li>Ultraviolet Range and Temperature Variation:</li> <li>SUIT operates in the ultraviolet range to capture specific wavelengths of solar radiation.</li> <li>Temperatures in the Photosphere range between 3,700 and 6,200 degrees Celsius.</li> <li>Chromosphere temperatures are between 3,700 and 7,700 degrees Celsius.</li> <li>Contribution to Aditya-L1 Mission:</li> <li>SUIT is one of the main payloads on the Aditya-L1 spacecraft.</li> </ul>
	It contributes crucial data to address scientific goals related to the Sun's behavior and phenomena. Face to Face Centres
