PM-eBus Sewa

Context: The Cabinet has given its approval for "PM-eBus Sewa," a scheme aimed at enhancing urban bus operations. Priority will be given to cities that currently lack organized bus services.

Scheme Overview

- The Cabinet, led by Prime Minister Shri Narendra Modi, has approved the "PM-eBus Sewa" scheme to enhance city bus operations using e-buses on a Public-Private Partnership (PPP) model.
- The scheme is set to deploy 10,000 e-buses across 169 cities.
- The total estimated cost of the scheme is Rs. 57,613 crores, with a Central government support of Rs. 20,000 crores. The scheme will cover bus operations for a duration of 10 years.

Scope and Priorities

- The scheme targets cities with a population of three lakh and above, as per the 2011 census. This includes Union Territory capitals, the North Eastern Region, and Hill States.
- Priority will be given to cities that currently lack organized bus services.
- The initiative aims to reach areas that are currently underserved by public transportation.

Employment Generation

- The deployment of around 10,000 e-buses is expected to generate direct employment for approximately 45,000 to 55,000 individuals in city bus operations.

Scheme Segments

- **Segment A - Augmenting City Bus Services:**
 - This segment focuses on augmenting city bus operations by introducing 10,000 e-buses through a PPP model.
 - Associated infrastructure development includes upgrading depot facilities and creating behind-the-meter power infrastructure for e-buses.
- **Segment B - Green Urban Mobility Initiatives (GUMI):**
 - This segment emphasizes green mobility initiatives, incorporating elements such as bus priority, multimodal interchange facilities, NCMC-based Automated Fare Collection Systems, and charging infrastructure.
 - The scheme supports the development of sustainable and environmentally friendly urban transportation solutions.

Operation and Support

- States and cities will be responsible for running the bus services and making payments to bus operators.
- The Central Government will provide subsidies as specified in the proposed scheme to support bus operations.

Promotion of E-Mobility

- The scheme aims to promote e-mobility by providing substantial support for behind-the-meter power infrastructure.
- Charging infrastructure development will be encouraged under the Green Urban Mobility Initiatives.
- The scheme's support for innovative and efficient electric buses aims to reduce noise, air pollution, and carbon emissions.

Mutual Recognition Arrangement of Authorised Economic Operators

Context: The Cabinet has given its approval for a Mutual Recognition Arrangement of Authorised Economic Operators between India and Australia.

Cabinet Approval and Entities Involved

- Cabinet chaired by PM Narendra Modi approves MRA signing.
- Involves Central Board of Indirect Taxes and Customs (CBIC) from India.
- Involves Department of Home Affairs (incorporating Australian Border Force) from Australia.

Reciprocal Benefits for Exporters and Streamlined Customs

- Offers benefits to accredited exporters from both countries.
- Simplifies customs clearance for imported goods.

Alignment with Global Standards and Secure Trade

- MRA aligns with World Customs Organization's SAFE Framework.
- Aims to ensure secure and efficient customs processes.

AEO

- An authorized economic operator (AEO) is a participant in international goods movement.
- AEO status is granted by a national Customs administration.
- AEOs are recognized for their compliance with supply chain security standards set by the WCO or similar entities.
- This recognition spans various roles, including manufacturers, importers, exporters, brokers, carriers, and more.
- It extends to entities like consolidators, intermediaries, ports, airports, terminal operators, integrated operators, warehouses, and distributors.

Face to Face Centres

Effective Implementation and Coordination

- MRA takes effect upon endorsement by authorized representatives.
- Proposed MRA text developed in collaboration with Customs Administrations.

Strengthened Trade Relationship and Smoother Procedures

- Expected to enhance trade ties between the two nations.
- Facilitates more streamlined customs procedures for exporters.

Promoting Secure and Efficient Cross-Border Trade

- Supports secure supply chains and promotes trade facilitation.

Anticipated Benefits

- Expected benefits encompass improved economic cooperation, enhanced trade efficiency, and secure cross-border trade between India and Australia.

Graphene-Aurora Programme

Context: The Ministry of Electronics & Information Technology (MeitY) has recently inaugurated the 'Graphene-Aurora program' in Kerala.

- Aims to bridge the gap between R&D and commercialization for startups and industries.
- Implemented by Digital University Kerala.
- Joint funding from MeitY, Government of Kerala, and industry partners.
- Establishes a Section 8 Company named 'India Graphene Engineering and Innovation Center (I-GEIC)'.
- Total budget of Rs 94.85 Crore.
- Industry partner: Carborundum Pvt Limited.
- Consideration of research centers like India Innovation Centre Graphene (IICG) for commercialization.
- Initial operations at the Digital Science Park in Trivandrum.
- Focus on nurturing the emerging Graphene technology ecosystem.
- Supports SMEs and startups in commercializing graphene technologies.
- Aiming to position India in the global new material market.
- Acknowledgment of Maker Village's contribution to hardware startup development.
- Commitment to creating a comprehensive ecosystem for Electronics Product Testing.

Graphene

- Graphene is a single layer of carbon atoms arranged in a honeycomb pattern.
- It's incredibly thin, strong, and highly conductive for both electricity and heat.
- Its remarkable properties have the potential to revolutionize various industries.
- Adding even a small amount of graphene can significantly enhance the strength or reduce the weight of materials.
- Graphene's exceptional heat conductivity makes it suitable for heat-spreading solutions like heat sinks.
- Applications range from microelectronics (e.g., more efficient LED lighting) to larger uses like thermal foils.
- Its high surface-area-to-volume ratio makes it promising for batteries and supercapacitors, enabling increased energy storage and faster charging.
- Graphene's potential applications extend to anti-corrosion coatings, sensors, efficient electronics, flexible displays, solar panels, DNA sequencing, drug delivery, and more.

NEWS IN BETWEEN THE LINES

SARS-CoV-2

What is SARS-CoV-2?

SARS-CoV-2 is a novel coronavirus responsible for the COVID-19 pandemic. It stands for "Severe Acute Respiratory Syndrome Coronavirus 2" and is a successor to the earlier SARS-CoV virus.

Global Emergence: Variants of SARS-CoV-2 seen worldwide.

Mutation Impact: Mutations alter virus characteristics.

RNA vs DNA Mutation: RNA viruses mutate faster due to lack of correction mechanisms.

Selective Advantage: Mutations can lead to virus dominance.

RBD Mutations: Receptor-binding domain changes affect virus entry and antibody interactions.

Vaccine Efficacy: Some variants impact vaccine effectiveness.

Pfizer, Moderna: Reduced efficacy against certain variants.

INSACOG: Indian consortium monitors and analyzes variants.

Genomic Surveillance: INSACOG tracks virus evolution, transmission, vaccine impact.

Denube River

The significance of the Sulina Channel in Ukraine's grain trade has become increasingly evident due to recent developments along the Danube River.

Location: The Danube River flows through multiple European countries, including Germany, Austria, Slovakia, Hungary, Croatia, Serbia, Bulgaria, Romania, Moldova, and Ukraine.

Length: Europe's second-longest river, stretching approximately 2,850 kilometers.

Source: Originates in the Black Forest region of Germany, flowing southeastwards.

Channels: Major channels in the delta include Chilia, Sulina, and St. George.

Sulina Channel: This distributary is the primary trade route connecting Ukrainian ports to the Black Sea, essential for grain exports. It is around 63 km long and lies within Romania.

Danube Delta: A UNESCO World Heritage Site, the delta is a complex wetland ecosystem supporting diverse flora and fauna.

Places in News

Triton Island

Location: Triton Island is situated in the South China Sea, specifically within the Paracel group of islands.

Disputed Territory: The island is a subject of dispute among multiple nations, including China, Vietnam and Taiwan, regarding sovereignty and territorial claims.

Chinese Presence: China has established infrastructure on Triton Island, including a small harbor, buildings, helipad, radar arrays, and more.

Airstrip Construction: Recent satellite images indicate that China is constructing an airstrip on Triton Island, similar to its actions on other islands in the region.

Strategic Significance: The island's location in the South China Sea holds strategic importance due to its proximity to shipping lanes and international waters.

Geopolitical Tensions: Triton Island's disputed status and China's construction activities contribute to ongoing geopolitical tensions in the South China Sea.

POINTS TO PONDER

- ❖ Which traditional rice variety is gaining popularity in Himachal Pradesh? - Red Rice
- ❖ Which is the highest mountain in Libya? - Bikku Bitti
- ❖ Where is Pong Dam located? - Beas River, India
- ❖ Which channel is significant for Ukraine's grain trade? - Sulina Channel
- ❖ What is the focus of the STEREO-A spacecraft mission? - Sun-Earth
